PROFESSIONAL SUMMARY

Software Engineer with 4+ years of experience building and shipping production applications using **Flutter, Dart, REST APIs, Firebase, Python, and FastAPI**. Experienced in application architecture, API integration, asynchronous workflows, local persistence, and production debugging. Built an **AI-powered content generation application** integrating mobile clients with local LLM and generative AI workflows, including **prompt validation, prompt engineering, structured AI outputs, and backend orchestration**. Seeking entry-level opportunities in **Generative AI, Applied AI, and LLM engineering**.

WORK EXPERIENCE

Vyas Cancer Research Park - Software Engineer (Flutter Developer) | Jun 2022 - Oct 2026

- **Architected a shared multi-flavor Flutter codebase** powering 2 production applications (Lumiseek and Health & Harmony) across Android and iOS, reducing code duplication and streamlining releases.
- **Integrated 150+ RESTful APIs** and implemented asynchronous request handling, structured JSON responses, error states, and Hive-based local persistence for reliable application workflows.
- **Resolved production issues** across FCM push notifications, deep-link routing, UI flows, and release builds, improving application reliability and user experience.
- **Optimized Android release builds** using ProGuard/R8 obfuscation and resource shrinking, reducing app size by ~15%.

PROJECTS

VIBE - AI-Powered Content Generation App (Personal Project) | Flutter, BLoC, Python, FastAPI, Ollama, Gemma 2B, Generative AI

- Built an end-to-end **Generative AI application** connecting a Flutter client with a Python/FastAPI backend for AI-driven video, image, and social-media content generation workflows.
- Integrated a local **Gemma 2B LLM through Ollama** for prompt validation and title/description generation, with prompt engineering to produce controlled, structured responses.
- Designed backend orchestration for third-party AI/media services, optional audio processing, API error handling, temporary-file workflows, and structured responses consumed by BLoC-based UI states.

Multi-Flavor Enterprise & Wellness Apps (Lumiseek & Health & Harmony) | Flutter, Dart, Firebase, Hive, REST APIs

- Developed a shared white-label architecture supporting an oncology research collaboration platform and a wellness booking ecosystem from a single maintainable codebase.
- Implemented reusable community, chat, appointment, scheduling, role-based access, and deep-linked notification workflows.

TECHNICAL SKILLS

Programming & Backend: Python, Dart, FastAPI, RESTful APIs, JSON, Postman

Databases: MySQL, Hive

Generative AI & LLMs: Generative AI, LLM Integration, Prompt Engineering, Ollama, Gemma 2B, Structured AI Outputs

Mobile Engineering: Flutter, Android, iOS, BLoC, Firebase

Tools: Git, Android Studio, ProGuard/R8, Third-Party API Integration

EDUCATION

Dadi Institute of Engineering and Technology

B.Tech, Computer Science Engineering - 2022 | CGPA: 7.3

CERTIFICATIONS

- **Generative AI Mastermind** - Outskill (2026)
- **Dart Programming** - Udemy (2023)
